Airdraw

Mini Bio

Dario Tello may not sound like a name you know. But if you switch your search for Airdraw you will meet a young producer who has been making a name for himself in the last few years, mainly because of his melodic and sentimental tunes, which have captured the attention of the likes of Above & Beyond, Armin Van Buuren, Paul Oakenfold, Gareth Emery, Andy Moor, Ferry Corsten, Porter Robinson, Maor Levi, Jaytech, Dash Berlin & Solarstone.

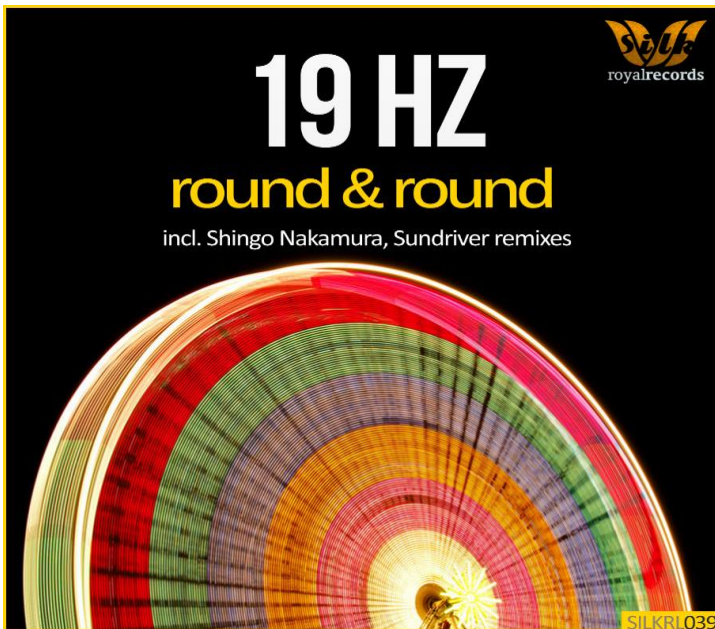

ABOUT AIRDRAW

Dario Tello was born in 1985 in Córdoba, Argentina. As a young student driven by his love for music he decided to become a sound technician a path which subsequently would lead him to give his first steps into composition. Up until now, Airdraw has released over 30 original tracks and has been requested to remix different artists. He has described his music as an “emotional voyage”.

In his desire to make more people aware of his productions, he has recently composed the soundtrack of a video game. His immense musical capability has given him the freedom to try new genres inside the electronic music scope and to collaborate with different producers. In the future, he hopes to continue discovering new sounds.
